

Final Reports Available through the National Technical Information Service

The submission of a comprehensive final report within 90 days after completion of the project is a requirement for all research grants awarded by the Maternal and Child Health Bureau. A file of such reports has been maintained since the inception of the MCHB Research Program and is currently housed at the National Center for Education in Maternal and Child Health (NCEMCH). Reports produced before 1980 are available only at NCEMCH, where they can be used as a reference resource. A list of these reports is available upon request from NCEMCH, 2000 15th Street, North, Suite 701, Arlington, VA 22201, phone (703) 524-7802, fax (703) 524-9335.

Final reports for MCHB research projects from 1980 to the present have been filed with the National Technical Information Service (NTIS), which provides copies to the public either on paper or microfiche. NTIS, an agency of the U.S. Department of Commerce, is the central source for the public sale of U.S. government-sponsored research, development, and engineering reports. The law establishing NTIS as a clearinghouse for scientific information directed that it be self-supporting; consequently, the costs of NTIS salaries and operating costs are paid from sales income.

In the listing that follows, final reports are presented in order by project number, corresponding in alphabetical order to the State of the grantee institution. (In a few cases, the principal investigator and research project transferred to an institution in another

state, so the project number and state do not correspond.) The report number assigned by the MCHB Research Program indicates the year in which the final report was received. For example, MCH/CCS-81/04 was the fourth report received by the MCHB Research Program office in 1981.

The number needed to order a document from NTIS is the accession or order number, a unique identifier assigned to each report catalogued by NTIS. Each report available from NTIS is assigned a price code. Although the price code for each report remains the same over the years, the price associated with each code is subject to change. Standard and out-of-print pricing classification is based on the year of publication; most reports produced more than 3 years ago are considered out of print. As of December 2000, the prices were as follows:

	Standard	Out of Print
